

Nina and the Neurons

Volcano

You will need

Small plastic bottle
Brown modelling clay
Bicarbonate of soda
White vinegar
Plastic container
Washing up liquid
Red food colouring

Remember to ask
a grown-up for help

1

Take the plastic bottle and use the modelling clay to make a cone shape around it.

Use more modelling clay at the bottom than the top to make the volcano shape.

3

Finally pour in the vinegar and watch your volcano erupt!

Afterwards, you can wash your volcano and make it erupt again and again.

2

Put your volcano onto a tray.

Add a small squirt of washing up liquid (about 2 tablespoons), 1 tablespoon of red or orange food colouring and 2 tablespoons of bicarbonate of soda
