

# WEAVE OWN

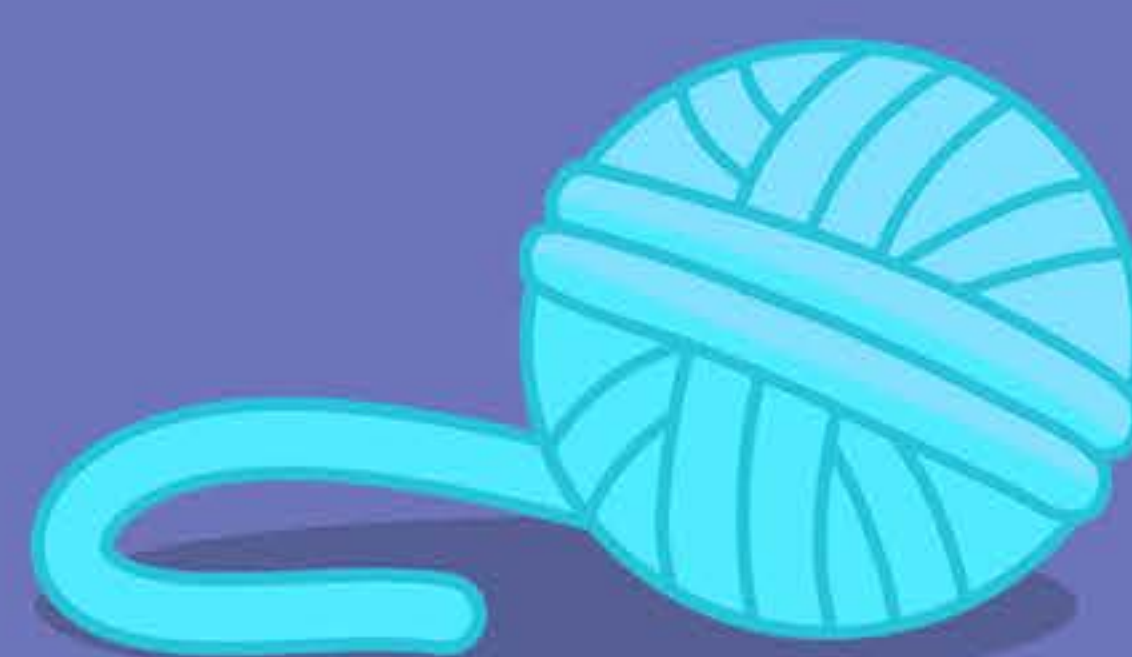

# YOUR FLAPPY

## WHAT YOU'LL need:

- 2 popsicle sticks
- 1 pipe cleaner
- 3 lengths of yarn in colours you like

- 5 small beads
- 2 large beads

1 Place your sticks to make an 'X' shape and use your first yarn colour to weave around the middle to keep them in place.

Then, wind the yarn from side to the side and top to bottom a few times. When you're ready, tie the first colour of yarn to the end of your second colour of yarn.

2 Now, weave over and under the popsicle sticks on one side of the wing. Then, tie your third length of yarn to the end of your second colour and continue weaving until you get to the end of your wing. Tie off the end off by threading the yarn through a piece you have already weaved and knot it. Tuck the tail into the wing before repeating on the other side.

3 Grab your pipe cleaner and fold it around the center of the 'X' shape, leaving the long two ends of the pipe cleaner at the top and a little room at the bottom. Then start twisting both sides of the pipe cleaner to keep it in place. After that, thread 2 large beads to the top and bottom, this will form the body, head and base of your Flappy.

4 Now, curl up the antenna and put some beads in the ends. Maybe one of the tail and you're done!
