

Woolly Mammoth Feet

You will need

Cardboard box
Pen or pencil
Scissors
Two colours of paint
A sponge
A plastic fork
Glue

Remember to ask
a grown-up for help

1

Take an old cardboard box and flatten it out. Place your foot or shoe onto the cardboard and draw a circle around it. You will need two, one circle for each foot. Cut both circles out.

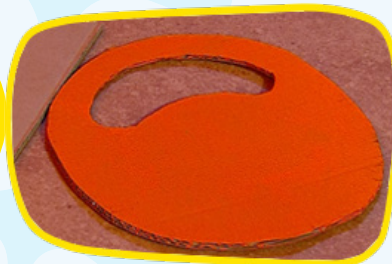

2

So they fit over your feet, cut a big smile shape near one side on both circles. Cutting cardboard is hard so ask your grown up to do this part.

3

Once you have cut everything out, paint the pieces on both sides with one colour, then leave them to dry.

4

To make your woolly mammoth feet look woolly, sponge on a second layer of paint in a different colour.

5

While the second layer is still wet, take a plastic fork and drag it through the paint to make lots of squiggly lines.

6

Cut 10 toenails from leftover cardboard and paint them.

7

Stick five toenails onto each foot and leave the ends hanging over a little bit.

Now you're ready to show off your stomping mammoth moves!
